**NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS) IMPLEMENTATION UPDATE**

On October 11, 2005, your Board adopted a resolution formally recognizing the National Incident Management System (NIMS) and adopting NIMS principles and policies into the County's emergency management system.

Beginning in Federal Fiscal Year (FFY) 2005, the Department of Homeland Security required a phased-in adoption and implementation of NIMS by State and local governments as a condition of receipt of Federal preparedness funds, including Homeland Security grants. State and local governments were required to meet the NIMS 2006 implementation requirements by September 30, 2006.

On September 28, 2006, the Governor's Office of Emergency Services submitted their certification of compliance with the NIMS requirements for FFY 2006. California based their self-certification on input from Operational Areas throughout the State, including input from the County of Los Angeles.

The attached reports summarize the efforts that both County departments and cities have made in complying with the 2006 NIMS Federal and State requirements.

The Office of Emergency Management will continue to work with County departments and Disaster Area Management Coordinators to ensure Operational Area compliance with all future NIMS requirements.

We would like to acknowledge the efforts that County departments, cities, and special districts have made thus far on this directive.
